You should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

INTERNAL RISK FACTORS

1. ***We are highly dependent on our suppliers for uninterrupted supply of raw-materials. We have not entered into any long-term supply agreement for the major raw materials required for manufacturing of our products. Also, volatility in the prices and non-availability of these raw materials may have an adverse impact in our business prospects, results of operations and financial condition.***

During Financial Year ended March 31, 2023, Financial Year ended March 31, 2022, Financial Year ended March 31, 2021, our top 10 suppliers amounted to ₹2,906.26 lakhs, ₹2395.78 lakhs and ₹1920.54 lakhs representing 72.16%, 60.69% and 59.31% of our total purchases in each respective period. We procure our supply of raw materials from various vendors in the market. We have not entered into any long-term supply agreement for supply of major raw materials. Currently, we have been able to secure timely supply of required raw material for our existing activity. Raw material is easily available in the domestic market and no difficulty is envisaged in sourcing of the raw material. In case of any disruption in supply of raw materials from these suppliers/vendors or our procurement of raw materials on terms that are not favorable to us; will adversely affect our operations and financial cost. Further in case our Company is unable to procure the requisite quantities of raw materials well in time and at competitive prices due to volatility in the prices of raw materials, the performance of our Company may be affected, thus adversely affecting our business, prospects, results of operations and financial condition.

2. ***We depend on a limited number of customers for a significant portion of our revenue from operations. The loss***

of any of our major customer due to any adverse development or significant reduction in business from our major customer may adversely affect our business, financial condition, results of operations, cash flow and future prospects.

Our top ten customers contributed 73.30% 87.96% and 83.58% respectively portion of our revenues from operation for the Financial Year ended March 31, 2023, Financial Year ended March 31, 2022, Financial Year ended March 31, 2021. However, the composition and revenue generated from these clients might change as we continue to add new customers in normal course of business. Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our significant customers, a failure to negotiate favourable terms with our key customers or the loss of these customers, all of which would have a material adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company. Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them.

We believe we have maintained good and long-term relationships with our customers. However, there can be no assurance that we will continue to have such long-term relationship with them also any delay or default in payment by these customers may adversely affect our business, financial condition and results of operations. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

3. *There are outstanding legal proceedings involving our Company, its Promoters and its Directors.*

There are outstanding legal proceedings involving our Company, its Promoters and its Directors. These proceedings are pending at different levels of adjudication. * To the extent quantifiable.

In *Vijay B. Tibdewal (on behalf of Anant Plastics Industries) vs. Pramara Promotions Limited and others – Application no. 563/202*, our Company has made payment of Rs. 19,09,880 towards the settlement amount and the only formality is withdrawing the application, which APL is in the process of withdrawing. In *Mars Packaging Industries vs. Pramara Promotions Limited – Case No. DD/01/S/DND/00058*, our Company has made part payment of Rs.3,75,512, and the amount outstanding to be paid by our Company is Rs. 7,51,023. The amount mentioned in the table is, therefore, reduced by the above 2 amounts.

There can be no assurance that these legal proceedings will be decided in our favour or in favour of our Director, Promoters and Subsidiaries. In addition, we cannot assure you that no additional liability will arise out of these proceedings that could divert our management's time and attention and consume financial resources. Any adverse order or direction in these cases by the concerned authorities even though not quantifiable, may have an adverse effect on our business, results of operations, financial condition and cash flows. For further details on the outstanding litigation proceedings, see "*Outstanding Litigation and Material Developments*" beginning on page 194 of this Prospectus. If a significant portion of these liabilities materialize, it could have an adverse effect on our business, financial condition, results of operations and cash flows.

4. We may not be able to obtain, renew or maintain the requisite permits and approvals in future and this may affect our business and operations.

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registrations and permits, some of which we have not applied for or have applied for but have not yet received.

Some of our approvals are in the previous name of our Company. We are taking necessary steps to transfer the same in the name of our Company. If we fail to transfer/obtain the same in the name of our Company, it may adversely affect our business or we may not be able to carry on our business till such time we obtain the approvals. Pending receipt of these approvals, we cannot assure you that we will not be subject to any adverse regulatory action. A failure to obtain, renew or maintain required permits or approvals may result in interruption of our operations and may have an adverse impact on our business, financial condition and results of operations and may also make us liable to certain statutory penalties. As on date, except the approvals stated above, the approvals required for our business are valid and subsisting. For further details of the validity of the approvals and pending approvals, please refer to the chapter "*Government and Other Approvals*" beginning on page 202 of this Prospectus.

We cannot further assure you that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof or pursuant to any regulatory action. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us may impede our operations. We may need to apply for further approvals in the future including renewal of approvals that may expire from time to time. There can be no assurance that the relevant authorities will issue such permits or approvals in the timeframe anticipated or at all.

5. We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other

proprietary rights

As on date of this Prospectus, our Company has five registered trademarks under various classes in India and have also applied for various trademark registrations in relation to our Company and our services. We cannot assure you that we will be successful in obtaining such registrations, for instance our application in the past has been rejected by the authorities and certain applications are under objection. However, the said trademark/logo is not used presently by our Company. For more details of such applications please refer to chapter titled "***Government and Other Approvals***" on page 202.

As a result, we may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that this registration is granted. One of our Promoter group entities has applied for artistic work, similar to our cc no. 94937, under class 36 which is sent to Vienna codification. We cannot guarantee that any of our registered or unregistered intellectual property rights or our know-how, or claims thereto, will now or in the future successfully protect what we consider to be the intellectual property underlying our products and business, or that our rights will not be opposed or otherwise challenged.

While we endeavour to ensure that we comply with intellectual property rights, there can be no assurance that we will not face any intellectual property infringement claims brought by third parties. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims and may divert the efforts and attention of our management away from our business. We could be required to change the name of our Company, pay third party infringement claims or obtain fresh licenses resulting from a name change. The occurrence of any of the foregoing could result in unexpected expenses. For further details please see "***Government and Other Approvals - Intellectual Property***" and "***Pending Intellectual property related approvals Application***" beginning on page 202 of this Prospectus.

6. *Our operating results may fluctuate from period to period which may affect our business and financial condition.*

There is a risk that our operating results may fluctuate. Some of the principal factors affecting our operating results include:

- our customers' sales and future business prospect, purchasing patterns and inventory managements;
- wide range of products we supply to our customers;
- pricing pressure from our competitors for similar products;
- our effectiveness in managing manufacturing processes, inventory management, making optimal use of available manufacturing capacity;
- breakdown, failure, or substandard performance of equipment and our ability to repair them thereby reducing the breakdown, failure, or substandard performance of equipment and our ability to repair them thereby reducing the impact on manufacturing process;
- Changes in demand for our products or change in customer preferences;
- timing of new technology development and requirement of our capability to upgrade;
- new product introductions and delays in developing the capability to produce new products;
- our ability to obtain financing in a timely manner;
- Local conditions and events that may affect our production volumes, such as labour conditions and political instability; and
- our ability to manage the timing of our component purchases so that components are available when needed for production, while avoiding the risks of purchasing such components in excess of immediate production needs.

The occurrence of any such or other problems could materially and adversely affect our business, financial condition, and results of operation. Thus, it is possible that in some future period our operating results or growth rate may be below the expectations of investors.

7. *We have experienced negative cash flows in previous years. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions.*

Our Company had negative cash flows from our operating activities, investing activities and financing activities in the previous year(s) as per the Restated Consolidated Financial Statements and the same are summarized as under:

(₹ In Lakhs)

Particulars	As on March 31, 2023	As on March 31, 2022	As on March 31, 2021
Net Cash Flow from / (used in) Operating Activities	564.55	783.42	(691.47)
Net Cash Flow from / (used in) Investing Activities.	20.85	(336.76)	(5.97)
Net Cash Flow from / (used in) Financing Activities	(539.03)	(362.06)	322.06

Cash flow of our Company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

8. ***Our business is dependent on our manufacturing facilities and we are subject to certain risks in our manufacturing process. Obsolescence, destruction, theft, breakdowns of our major plants or machineries or failures to repair or maintain the same may affect our business, cash flows, financial condition and results of operations.***

We have our manufacturing facility located at Daman. Our business is dependent upon our ability to manage our manufacturing facilities, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe climate conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair breakdown of machinery in a timely manner or at all, our operations may need to be suspended until we procure new machinery to replace the same.

Obsolescence, destruction, theft or breakdowns of our major plants or machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect our business, cash flows, financial condition and results of operations. Although we have not experienced any significant disruptions at our manufacturing facilities in the past, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shut-down of our operations or under-utilization of our manufacturing facilities, which in turn may have an adverse effect on our business, results of operations and financial condition. Any slowdown or shutdown in our manufacturing operations or underutilization of our manufacturing facilities could have an adverse effect on our business, results of operations and financial condition.

9. ***We propose to utilize a portion of the Net Proceeds for funding working capital requirements of our Company.***

Our Company intends to utilise a portion of the Net Proceeds for funding the working capital requirements of our Company. The detail use of the Net Proceeds towards working capital requirements of our Company have been disclosed in the chapter titled “***Objects of the Issue***” beginning on page 68 of this Prospectus. We believe that the working capital will be primarily used for expanding our current business operations. The funding of the working capital requirements of our Company is expected to lead to a consequent increase in our profitability.

10. ***The objects of the Offer include funding working capital requirements of our Company, which are based on certain assumptions and estimates.***

We intend to use the Net Proceeds for the purposes described in chapter titled “***Objects of the Issue***” on page 68. As on the date of this Prospectus, our funding requirements are based on management estimates in view of past expenditures, and have not been appraised by any bank or financial institution. The objects of the Issue include funding working capital requirements of our Company, which are based on management estimates and certain

assumptions in relation to inter alia, the cost and holding periods of inventories of raw materials and finished goods, trade receivables and trade payables. For details, see “*Objects of the Issue*” on page 68 of this Prospectus. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements

11. We have issued equity shares during the last one year at a price that may be below the Issue Price.

During the one year preceding the date of this Prospectus, we have issued bonus Equity Shares, which is at a price that may be lower than the Issue Price. For details, refer to the chapter titled “*Capital Structure*” beginning on page 71 of this Prospectus. The price at which the equity shares of our Company have been issued in the immediately preceding year is not indicative of the price at which they will be issued or traded. For further information, refer to the chapter titled “*Capital Structure*” beginning on page 71 of this Prospectus.

12. A few of our properties including the factory premises and godown of our Company, are not owned by us.

In the event, we are unable to renew the lease/rent agreements, or if such agreements are terminated, we may suffer a disruption in our operations. Some of our business premises which include factory premises and godown of our Company, are taken on lease of varying tenures. These leases are renewable on mutually agreed terms. Upon termination of the lease, we are required to return the said business premises to the Lessor/Licensor, unless renewed. If we are unable to renew certain or all of these leases on commercially reasonable terms or at all and we cannot relocate our manufacturing facility and godown in a timely manner, we may suffer a disruption in our operations, and our results of operations, financial condition and cash flows may be materially and adversely affected. There can be no assurance that the term of the agreements will be renewed and in the event the Lessor/Licensor terminates or does not renew the agreements on commercially acceptable terms, or at all, and we are required to vacate our offices, we may be required to identify alternative premises and enter into fresh lease or leave and license agreement. Such a situation could result in loss of business, time overruns and may adversely affect our operations and profitability.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI ICDR Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Offer, refer chapter titled "**Objects of the Issue**" beginning on page 68 of this Prospectus.

14. Our Company has incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations. Our financing agreements impose certain restrictions on our operations, and our failure to comply with operational and financial covenants may adversely affect our reputation, business and financial condition.

As on March 31, 2023, we had total long-term borrowings of ₹ 1417.68 Lakhs. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our business. Our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of transactions. In the event that we breach a restrictive covenant, our lenders could deem us to be in default and seek early repayment of loans. An event of default would also affect our ability to raise new funds or renew maturing borrowings as needed to conduct our operations and pursue our growth initiatives. While there has been no event of default, we cannot assure you that our Company may not default towards the repayment of the outstanding loan in the future.

For, further details on our outstanding debt please refer to the chapter titled "**Financial Indebtedness**" beginning on page 190 of this Prospectus.

15. The price, at which we are able to obtain the raw material for manufacture of our finished products depend largely on prevailing market prices. Increase in costs of our raw materials could have a material adverse effect on our Company's sales, profitability and results of operations.

Our Company is dependent on third party suppliers for procuring raw materials. We are exposed to fluctuations in the prices of these raw materials as well as its unavailability, particularly as we typically do not enter into any long-term supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure the materials. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations. Though we enjoy favourable terms from the suppliers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost-effective manner would cause delays in our production and delivery schedules, which may result in the loss of our customers and revenues.

16. Pricing pressure from our competitors may affect our ability to maintain or increase our product prices and, in turn, our revenue from product sales, gross margin and profitability, which may materially and adversely affect our business, cash flows, financial condition and results of operations.

Competitive pricing by our competitors may manifest in various forms, including, among others, through our competitors lowering their prices for similar products. This may lead to a decrease in our revenues and profits. We may seek to reduce the price of our raw materials and production through negotiations with our suppliers and streamline product designs to offset the impact of pricing pressure. We cannot assure you that we will be able to avoid future pricing pressure from our competitors or offset the impact of any price reductions through improved operational efficiencies, cost-effective sourcing alternatives, new manufacturing processes, or other cost reductions through other productivity initiatives. If we were to face competitive pricing from our competitors, and

the aforementioned measures or other steps we take fail to maintain or increase our margins and revenues from product sales, our business, financial condition and results of operations may be adversely affected.

17. *We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.*

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

18. *We have not identified any alternate source of raising the funds mentioned as our 'Objects of the Issue'. Any shortfall or delay in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds for working capital cycle or may result in us borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the Company.

19. *There have been certain instances of regulatory non-compliances or delays or errors in the past. We may be subject to regulatory actions and penalties for any such past or future non-compliance or delays or errors and our business, financial condition and reputation may be adversely affected.*

As a Company, we are required to file various forms with the RoC under the provisions of the Companies Act, 2013. For instances our Independent Director namely, Dalpat Mehta and Suhail Motlekar had registered their names in the Independent Director's databank under MCA post their appointment as the Additional Independent Director. While there are no significant implications of such appointment, we cannot assure that we may require to pay any fine in the future.

We are also unable to trace bank statements of the Company and Promoter for further allotment made during the year 2006 to 2016.

There are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, which inter-alia includes such as incorrect/ incomplete attachments to the forms, clerical errors by our Company with the ROC. Further, there have been instances of delayed filings and non-filing with respect to the certain forms filed by our Company with the RoC and regulatory authority. Additionally, there are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, which inter-alia includes clerical errors in the resolution filed by our Company the ROC. For instance, 1) the attachment of resolution pertaining to appointment of Rohit Lamba as Chairman was missing in the DIR 12 form filed with RoC; 2) in the PAS-3 filed by the Company with the RoC, they had inadvertently selected/tick box of securities payable in cash rather than securities allotted for consideration other than cash; 3) the DIR 12 form was filed for appointment Dalpat Mehta and Suhail Motlekar as Independent Director whereas the resolution attached was for appointment as additional director; 4) the allotment ratio was inadvertently mentioned wrong in the resolution attached as an attachment to the form PAS-3; 5) few of the transfer records are not forming part of the annual return forms; 6) no resolution is attached in the DIR-12 for the appointment of Sanket Lamba and 7) delayed filing of the DIR 12 form with respect to the regularization of Dalpat Mehta and Suhail Motlekar as Non-Executive Independent Directors, due to technical issues being faced while filing with the RoC.

In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business, financial conditions and result of operations.

We are also required to make certain payments to various statutory authorities from time to time, including but not limited to payments pertaining to employee provident fund, employee state insurance, income tax and excise duty. While such undisputed dues are regularly deposited during the year with the appropriate authorities, there have been delays in this respect for -payment of GST for Fiscal, 2017, 2018, 2019, 2020, 2021, 2022 for Delhi and Mumbai respectively, for Fiscal 2017, 2018, 2019, 2020, 202 for Madhya Pradesh, for fiscal 2021, 2022 and 2023

Further, our step-down subsidiary, namely Essel Marketing Promotions (Shenzhen) Co. Limited have not filed certain regulatory filings with the relevant authorities for the past years due to COVID-19 restrictions. Our Company is in the process of winding up of our step-down subsidiary, but we cannot assure that we will be able to comply with all regulatory requirements prior to the winding up and we may be liable to certain fines and charges by the relevant authorities.

Any failure or delay in payment of such statutory dues may expose us to statutory and regulatory action, as well as significant penalties, and may adversely impact our business, results of operations and financial condition.

We cannot assure you that, in the future, we will not be subject to any liability on account of such noncompliance's or that no action would be taken by the RoC or any other regulatory or statutory body in future in relation to this error. If we are subject to any such liability, it may have a material adverse effect on our reputation, financial condition and results of operations. Further, there can be no assurance that there will be no such delays or non-compliances in the future and our Company will not be subject to adverse actions by the authorities.

20. *Return of Allotment form filed with the Registrar of Companies is not traceable.*

The form for return of allotment, i.e. Form 2 dated March 31, 2007 and challan evidencing the payment of fee filed for the filed with the Ministry of Corporate Affairs in India (the "MCA") for certain past allotments of Equity Shares made by our Company filings and records are not traceable as the relevant information, at the MCA Portal maintained by the MCA and the RoC.

We cannot assure you that the relevant corporate records will become available in the future, or actions will not be initiated against us in the future, or that we will not be subject to any penalty imposed by the competent regulatory authority in this respect.

While certain information in relation to these allotments has been disclosed in the chapter title "*Capital Structure*" beginning on page 57, in this Prospectus, based on the board resolutions, statutory registers of members and audited financial statements of our Company. We also cannot assure you that we will not be subject to any adverse action by any authority in relation to such untraceable records.

21. *Reliance has been placed on declarations furnished by Rohit Lamba, our Chairman and Managing Director, for details of their profile included in this Prospectus.*

Our Director, Rohit Lamba, has been unable to trace copy of his graduation certificate. While he has taken the requisite steps to obtain the relevant supporting documentation, including by making a written application Mumbai University, he has not been able to procure the same Accordingly, our Company and the Lead Manager have placed reliance on the declarations furnished by Rohit Lamba, to disclose such details in this Prospectus and neither we, nor the Lead Manager have been able to independently verify these details in the absence of primary documentary evidence. Further, there can be no assurances that he will be able to trace the relevant documents pertaining to their work experience in the future, or at all. Therefore, we cannot assure you that all or any of the information relating to the work experience of Directors included in "*Our Management*" on page 128 is accurate.

22. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Modernization and technology upgradation are essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial

conditions. In case of a new-found technology in the manufacturing facilities, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

23. *Our insurance coverage may not adequately protect us, which may adversely affect our business, results of operations and financial condition.*

We believe that the insurance coverage maintained, would reasonably cover all normal risks associated with the operation of our business, however, there can be no assurance that any claim under the insurance policies maintained by us will be met fully, in part or on time. In the event, we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

24. *If we are subject to any frauds, theft, or embezzlement by our employees, it could adversely affect our reputation, results of operations, financial condition and cash flows.*

Our operations may be subject to incidents of theft or damage to inventory in transit, prior to or during stocking or delivery. Our industry typically does not encounter inventory loss on account of employee theft, vendor fraud, and general administrative error. We maintain large amounts of inventory at our manufacturing facilities at all times. Although we have relevant controls in place and have not experienced any such instances, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition.

25. *Our Company is dependent on third party transportation providers for the delivery of our products and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.*

In some instances, we depend on third-party transportation for our business needs. This makes us dependent on such third-party transportation providers. Weather-related problems, strikes, or other events which affects third-party transportation could impair our ability to receive the raw materials and/or deliver the requisite quantities of products in time to our customers, which could adversely affect the performance of our business, results of operations and cash flows. The occurrence of all or any of the above factors will result in delays in deliveries to our customers which could further cause a shutdown in our customer's production processes exposes us to damage and penalties, adversely affect our reputation, cause a loss of business and adversely impact our results of operations. Further, there is no assurance that the amount of our insurance coverage will be sufficient to satisfy any damages arising from the occurrence of all or any of the above risks.

26. *We are subject to strict quality requirements and are consequently required to incur significant expenses to maintain our product quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.*

We are manufacture and supply promotional toys and gifts, plastic household products and plastic packaging containers, etc. based on order given by our customers. Given the nature of our products and the sector in which we operate, our customers have high and precise standards for product quality as well as delivery schedules. Adherence to quality standards is a critical factor in our manufacturing process as any defects in the products manufactured by our Company or failure to comply with the technical specifications of our customers regarding the size and length may lead to cancellation of the orders placed by our customers. Further, any failure to make timely deliveries of products in the desired quantity as per our customers' requirements could also result in the cancellation of orders placed by our customers and may adversely affect our reputation and goodwill. In addition, our customers may demand, among others, price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by moving more work in-house,

or replace their existing products with alternative products, any of which may have an adverse effect on our business, cash flows, results of operations and financial condition.

- 27. *Our Company does not have any listed peer companies with the same line of business for comparison of performance and therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.***

Business models of some of the listed companies which undertake certain business, which may be considered similar to our business are not comparable to our business model based on (i) percentage of contribution made by their business activities to the total revenue of these listed companies; and (ii) nature and extent of manufacturing activities in diverse sectors undertaken by these listed companies or by our Company. Therefore, there are no nearest listed companies with the same line of business that may be considered as the peer group of our Company. Therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.

- 28. *We have in the past entered into related party transactions and may continue to do so in the future.***

Our Company has entered into transactions with our certain related parties and are likely to do so in the future. While we believe that all such transactions have been conducted on an arm's length basis and in the ordinary course of business and in accordance with the relevant provisions of Companies Act and all others applicable laws. There can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. All related party transactions that we may enter into post-listing, will be subject to an approval by our Audit Committee, Board, or Shareholders, as required under the Companies Act and the SEBI Listing Regulations. Such related party transactions in the future or any other future transactions may potentially involve conflicts of interest which may be detrimental to the interest of our Company and we cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, financial condition, results of operations, cash flows and prospects. For details on the transactions entered by us, please refer to Chapter titled "*Restated Consolidated Financial Statement*" beginning on page 148 of this Prospectus.

- 29. *Information in relation to our installed capacity and capacity utilization of our manufacturing facility included in this Prospectus is based on various assumptions and estimates, and future production and capacity utilization may vary.***

Information relating to our installed capacities and the capacity utilization of our manufacturing facility included in this Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials, actual product mix vis-à-vis the products mix envisaged for computation of our installed capacity and assumptions relating to potential utilization levels and operational efficiencies. While we have obtained a certificate dated August 16, 2023 from M/s. Palande Vinod A., actual capacities and utilization rates may differ significantly from the estimated installed capacities or estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our installed capacity or estimated capacity utilization information for our existing facility included in this Prospectus.

- 30. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 31. *Delays or defaults in client payments could affect our operations.***

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment

obligations to us may have a material effect on our business, financial condition and results of operations.

32. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or get manufactured by third parties on our account, we may be required to write-down our inventory or pay our suppliers without new purchases or create additional vendor financing, which could have an adverse impact on our income and cashflows.

33. *Any non-compliance of any of the provisions of non-Disclosure agreement by the employees' effect on our reputation, business, financial condition and results of operations.*

Our Company executes non-disclosure agreement with some of our clients to protect their technical know-how, product designs, third party license and business secrets. The disclosure of any of this information by our employees to the competitor or counterfeit any of these products may affect our business adversely. Though, we are taking utmost care to maintain secrecy in our business process, we are not sure that we shall be able maintain complete secrecy. The disclosure of such information about us and our products could have an adverse effect on our business, resulting operations, financial condition and prospects.

34. *Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.*

After the issue our Promoters along with the Promoter group will continue to hold collectively 66.81% of the post Equity share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder's vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

35. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, please refer to the Chapter titled "*Dividend Policy*" beginning on page 147 of this Prospectus.

36. *Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency and our management will have broad discretion over the use of the Net Proceeds.*

We intend to utilize the Net Proceeds of the Offer as set forth in "*Objects of the Issue*" beginning on page 68 of this Prospectus. The funding requirements mentioned as a part of the objects of the Offer are based on internal management estimates in view of past expenditures and have not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, business initiatives, other financial conditions or business strategies and since we have not presently entered into any definitive agreements for the use of Net Proceeds. Various risks and uncertainties, including those set forth in this section, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. For example, we may also use funds for future businesses and products which may have risks significantly different from what we currently face or may expect. Accordingly, use of the Net Proceeds for

other purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of our business and your investment. For further details, please see **“Objects of the Issue”** beginning on page 68 of this Prospectus

37. ***Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

There are no non-compete agreements between our Company and our subsidiary company and promoter group entities. Our Subsidiaries and promoter group entities are in the similar line of business as of our Company. We have not

entered into any non-compete agreement with our subsidiary company and promoter group entities. While our subsidiaries are wholly owned by us, there can be no assurance that our promoter group company will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Further, our promoter group company may enter into business in future in such circumstances the interest of the Company may conflict with the interest of the promoter group entities and any such present and future conflicts may adversely affect our profitability and results of operations. For further details, please refer to chapter titled **“Our Subsidiaries”**, **“Our Promoter and Promoter Group”** and **“Our Group Companies”** beginning on page 126, on page 142 and 146 respectively of this Prospectus.

However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

For details, please refer Chapter titled **“Objects of the Issue”** beginning on page 68 of the Prospectus.

43. *We appoint contract labour for carrying out certain of our operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations and financial condition.*

In order to retain flexibility and control costs, our Company appoints independent contractors who in turn engage on-site contract labour for performance of certain of our operations. Although our Company does not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractor. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition and we may also be subject to legal proceedings in this regard. In addition, under the Contract Labour (Regulation and Abolition) Act, 1970, as amended, we may be required to absorb a number of such contract labourers as permanent employees. Thus, any such order from a regulatory body or court may have an adverse effect on our business, results of operations and financial condition.

44. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. EXTERNAL RISK FACTORS

45. *Our business is dependent on economic growth in India.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India’s economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other

countries, particularly in emerging market in Asian countries. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause

increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

46. *An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our operations.*

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus and its variants, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition.

47. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between nonresidents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

48. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

49. *Political, economic, legal, tax, operation and other factors that are beyond our control may have an adverse effect on our business and results of operations.*

The following external risks may have an adverse impact on our business and results of operations should any of them materialise:

- a) high rates of inflation in India and in countries where we operate our business could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins;
- b) changes in existing laws and regulations in India and in countries where we operate our business;
- c) changes in trade policies, in terms of tariff and non-tariff barriers; and
- d) a slowdown in economic growth or financial instability in India and in countries where we operate our business could adversely affect our business and results of operations.

50. *If the rate of Indian price inflation increases, our results of operations and financial condition may be adversely affected.*

In recent years, India's wholesale price inflation index has indicated an increasing inflation trend compared to prior periods. An increase in inflation in India could cause a rise in the price of transportation, wages, raw materials

or any other expenses. In particular, the prices of raw materials required for fabrication of our products are subject to increase due to a variety of factors beyond our control, including global commodities prices and economic conditions. If this trend continues, we may be unable to reduce our costs or pass our increased costs on to our customers and our results of operations and financial condition may be materially and adversely affected.

51. *Any downgrading of India's debt rating by a domestic or international rating agency could have a negative impact on our business.*

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of our Equity Shares.

52. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.*

Our Company is subject to various regulations and policies. For details refer to the Chapter titled "**Key Industry Regulations and Policies**" beginning on page 96 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

53. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other/adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

54. *Emergence of competition from other manufacturing countries.*

The global ink market is highly competitive. We may face global competition from countries. Our market position will depend on effective marketing initiatives and our ability to anticipate and respond to various competitive factors affecting the industry including pricing strategies. Any failure by us to compete efficiently, including in terms of pricing, could adversely affect our business, operations and profitability.

Risk Related to our Equity shares

55. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares has been determined by our Company in consultation with the LM, and through the Fixed Issue Process. This price is based on numerous factors, as described under "**Basis for Issue Price**" beginning on page 76 of this Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Issue Price.

56. *Rights of shareholders under Indian laws may differ to those under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders'

rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be similar to the shareholders' rights under the laws of other countries or jurisdictions.

57. *The trading volume and market price of the Equity Shares may be volatile following the Issue.*

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

58. *Our Equity Shares have not been publicly traded prior to this Issue. After this Issue, our Equity Shares may experience price and volume fluctuations and an active trading market for our Equity Shares may not develop. Further, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.*

Prior to this Issue, there has been no public market for our Equity Shares. An active trading market on the Stock Exchanges may not develop or be sustained after this Issue.

The trading price of our Equity Shares after this Issue may be subject to significant fluctuations in response to factors including general economic, political and social factors, developments in India's fiscal regime, variations in our operating results, volatility in Indian and global securities markets, developments in our business as well as our industry and market perception regarding investments in our business, changes in the estimates of our performance or recommendations by financial analysts, and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. The trading price of our Equity Shares may also decline in reaction to events that affect the entire market and/or other companies in our industry even if these events do not directly affect us and/or are unrelated to our business or operating results.

59. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

60. *Foreign investors are subject to foreign investment restrictions under Indian law that limit our ability to attract foreign investors, which may adversely affect the trading price of our Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the requirements specified by the RBI. If the transfer of shares is not in compliance with such requirements or falls under any of the specified exceptions, then prior approval of the RBI will be required. Further, in accordance with press note 3 of 2020, dated April 17, 2020, issued by the Department for Promotion of Industry and Internal Trade, Government of India, the FDI Policy has been recently amended to state that all investments by entities incorporated in a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. These investment restrictions shall also apply to subscribers of offshore derivative instruments.

In addition, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no-objection or tax clearance certificate from the income tax authority. Additionally, the Indian government may impose foreign exchange restrictions in certain emergency situations, including situations where there are sudden fluctuations in interest rates or exchange rates, where the Indian government experiences extreme difficulty in stabilizing the balance of payments or where there are substantial disturbances in the financial and capital markets in India. These restrictions may require foreign investors to obtain the Indian government's approval before acquiring Indian securities or repatriating the interest or dividends from those securities or the proceeds from the sale of those securities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

61. *Investors may have difficulty enforcing foreign judgments against us or our management.*

We are a limited liability Company incorporated under the laws of India. All our directors and executive officers are residents of India and a majority of our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon us or such persons outside of India, or to enforce judgments obtained against such parties outside of India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of CPC on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

62. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Capital gains arising from the sale of equity shares within 12 months in an Indian Company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") is paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, is subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares is exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident.

Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares

63. *Any future issuance of Equity Shares by us may dilute your shareholding and sales of the equity shares by our Promoter, Promoter Group or other major shareholders may adversely affect the trading price of the Equity Shares.*

We may be required to finance our growth through future equity offerings. Any future issuance of Equity Shares by us may dilute your shareholding in us. In addition, any sales of substantial amounts of the Equity Shares in the public market after the completion of the Issue, including by our Promoter or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could materially impair future ability of us to raise capital through offerings of the Equity Shares. Any future issuances of Equity Shares or the disposal of Equity Shares by our major shareholders including our Promoters, or the perception that such issuance or sales may occur, may adversely affect the trading price of our Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. There can be no assurance that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or encumber their Equity Shares. Any future issuances could also dilute the value of your investment in our Equity Shares. We cannot predict the effect, if any, that the sale of the Equity Shares held by our Promoter or other major shareholders or the availability of these Equity Shares for future sale will have on the market price of the Equity Shares.

64. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

A public Company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offer document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

65. *There is no guarantee that our Equity Shares will be listed on NSE Emerge in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue.

In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the NSE Ltd within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

66. *The requirements of being a listed Company may strain our resources.*

We are not a listed Company and have historically not been subjected to the compliance requirements and increased scrutiny of our affairs by shareholders, regulators and the public at large associated with being a listed Company. As a listed Company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted Company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations or cash flows as promptly as other listed companies.

Further, as a listed Company, we will be required to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily

transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

67. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011 ("SEBI Takeover Regulations"), an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of our Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

68. *Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a Company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian Company than as shareholders of an entity in another jurisdiction.

69. *If certain labour laws become applicable to us, our profitability may be adversely affected.*

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

70. *Investors will not be able to sell immediately on an Indian stock exchange any of our Equity Shares they purchase in the Offer.*

Our Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before our Equity Shares can be listed and trading in our Equity Shares may commence, including the crediting of the Investors "demat" accounts within the timeline specified under applicable law.

Furthermore, in accordance with Indian law, permission for listing of our Equity Shares will not be granted until after our Equity Shares in this Offer have been Allotted and submission of all other relevant documents authorizing the issuing of our Equity Shares. The Allotment of Equity Shares in the Offer and the credit of such Equity Shares to the applicant's demat account with a depository participant could take approximately five Working Days from the Issue /Offer Closing Date, and trading in our Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within six Working Days of the Issue/Offer Closing Date. There could be a failure or delay in listing of our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise to commence trading in our Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that our Equity Shares will be credited to investors' demat accounts, or that trading in our Equity Shares will commence, within the prescribed time periods or at all. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not

dispatched or demat credits are not made to investors within the prescribed time periods.

71. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily “circuit breaker” imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares’ circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

Rationale for changes in working capital requirements

The variation in working capital requirement is due to the impact of COVID-19 in 2021, which has impacted the promotional business. Our sales have reduced from ₹6403.39 lakhs to ₹4078.31 lakhs in FY 2021 and was marginally increased in FY 2022 to ₹4915.58 lakhs. This also impacted our inventories and receivable cycles. The variation for the period ended December 31, 2022 would get regularized by the end of the year and we estimate to be in-line as provided in the Prospectus.

The increase in working capital requirement is in correspondence to the projected increase in revenue from operations. You will observe that we have maintained the trade receivables days and inventories days in line with estimated working capital requirements for FY 2023.

Expected working capital requirements

The estimates of the working capital requirements for the Financial Year ended March 31, 2023 and Financial Year ended March 31, 2024 has been prepared based on the management estimates of current and future financial performance. GLOBAL ECONOMIC OVERVIEW

The global toys market reached a value of US\$ 156.5 Billion in 2021. Looking forward, the publisher expects the market to reach a value of US\$ 249.6 Billion by 2027 exhibiting a CAGR of 7.50% during 2022-2027. Keeping in mind the uncertainties of COVID-19, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic. These insights are included in the report as a major market contributor.

Toys are playthings used to foster learning and growth in infants and children at an early stage of their development. They also boost the intelligence quotient (IQ), increase motor development, improve concentration and creativity, and promote the personality and communication skills. They are generally made using wood, metal, textiles, polyethylene, polypropylene, ethylene-vinyl acetate (EVA), styrene-derived polymers, and technical plastics like polyamide, polycarbonate, or polymethyl methacrylate. Nowadays, leading players are introducing innovative toys manufactured using biodegradable polymers like plasticized polyvinyl chloride (PVC). They are also offering hi-tech electronic toys through online distribution channels.

MARKET TREND

Introducing physical activity and educational toys at an early stage of a child's development enhances their senses, imagination, and social skills. This, in confluence with the rising concerns among parents about the social and emotional development of their child, represents one of the key factors impelling the market growth. Moreover, playschools are offering science, technology, engineering, and mathematics (STEM) toys, such as boxes, blocks, musical instruments, and jigsaw puzzles, in their education to instill creativity and problem-solving skills in kids.

Apart from this, the thriving e-commerce industry on account of the increasing reliance on smartphones and the growing internet penetration is driving the sales of innovative electronic and digital toys over conventional battery-operated toys. Furthermore, the increasing popularity of tech-savvy electronic toys among children as well as adults that depict action figures like Batman, Superman, Ironman, and Captain America is contributing to the market growth. Besides this, governments of numerous countries are encouraging companies to design and introduce toys based on culture, ethos, and local folklore and heroes, which is anticipated to drive the market.

INDIAN ECONOMIC OVERVIEW

The Indian toys market size reached US\$ 1.5 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 3.0 Billion by 2028, exhibiting a growth rate (CAGR) of 12.2% during 2023-2028. The key factors in deriving the growth is the growing demand for educational toys to enhance experimental learning experiences among the children, along with the advent of innovative electronic digital toys, is primarily driving the Indian toys market.

India exports sports goods and toys to about 129 countries across the globe. India's major toy export destinations include the USA, the UK, Germany, Mexico, and the Netherlands. In India, among states, Maharashtra leads the Indian toy and game exports; the exports grew to US\$ 76.3 million in 2019–20 from US\$ 32.9 million in 2017–18. Uttar Pradesh and Karnataka are other key states, with toy and games exports valued at US\$ 49.4 million and US\$ 36.4 million, respectively. In 2021–22, the US was the largest importer of Indian toys, valued at US\$ 69.3 million, accounting for 39% of the total exports from the country. The other

key toy export destinations include the UK and Germany, with a share of 10% and 6%, respectively. The share of the top 10 countries importing Indian toys and games increased to 74% at a CAGR of 13% between 2020 and 2016. It implies the importance of traditional markets in the growth in exports and continued demand momentum for Indian products. Among the various emerging markets, the UAE holds strong growth potential for Indian toy exports, as the country leads in terms of demand for children’s toys in the Middle East region. India can capture the lion’s share in the UAE market by taking advantage of the large Indian population residing in the country.

INDIA’S GROWING TOY EXPORTS

India’s toy manufacturing industry is quite fragmented, consisting of over 4,000 toy manufacturing units located in states such as Uttar Pradesh, Maharashtra, Karnataka, and Tamil Nadu. MSMEs manufacturing toys are spread all over the country; around 88% of the total manufacturing units are based in the northern and western regions. Toy categories such as dolls; soft toys for pre-schoolers, babies and infants; and board games are growing, driven by the Government of India’s push for indigenisation. The toy manufacturing industry is labour-intensive; thus, expanding the manufacturing base by setting up new toy clusters would drive job creation.

The Indian toy industry manufactures a wide variety of toys which can be broadly classified into two categories based on their application and purpose – educational and recreational. Educational toys include toys and games made from plastics and cardboard. On the other hand, recreational toys mainly include electronic (remotely control-based, video games), battery-operated, plastic, soft and mechanical pull-back toys. Of these, battery-operated and electronic toys, and video games are only imported and not manufactured locally. All other types of toys are manufactured in India as well as imported.

TOY EXPORTS MARKET OPPORTUNITY

Globally, the main factors boosting the demand for toys include the growing young population, changing spending habits with rising disposable income and shifting trend from traditional toys to electronic toys, powered by innovative technologies. The global toy trade was valued at US\$ 93 billion in 2020. The Indian toy industry, with a share of just 0.2% in global toy exports, has significant potential to grow. Toy exports from India increased from US\$ 72.5 million in 2016–17 to US\$ 177.0 million in 2021–22. Tricycles, scooters, pedal cars and similar wheeled toys, dolls’ carriages, puzzles of all kinds, and recreational toys are among the key toy categories exported from India. The consistent growth in Indian toy exports could be attributed to initiatives such as Make in India and Vocal for Local under the Atmanirbhar Bharat scheme aimed to create a competitive environment for toy manufacturers in India and promote Indian toys globally. India has the potential to become a major export hub for electronic toys, including science, technology, engineering, and math (STEM) toys and video game consoles, which are in high demand in the global toys and games market.

NATIONAL TOY ACTION PLAN

The Government of India has prepared a National Toy Action Plan to make the Indian toy industry competitive and push the 'Make in India' initiative by boosting the domestic manufacturing of toys.

SCHEME OF FUND FOR REGENERATION OF TRADITIONAL INDUSTRIES (SFURTI)

The primary objective of this scheme is to organise the traditional toy industries and artisans into clusters to make them competitive by enhancing the product marketability of such clusters and provide support to generate sustainable employment. It includes a range of initiatives focusing on providing traditional artisans of associated clusters with training on innovative skills; making provisions for common facilities equipped with enhanced tools for artisans; developing cluster governance systems with the active participation of stakeholders; and developing advanced processes, market intelligence and new models of public-private partnerships.

PRODUCT-SPECIFIC INDUSTRIAL CLUSTER DEVELOPMENT PROGRAMME

The Product-Specific Industrial Cluster Development Programme aims to build toy clusters in dedicated SEZs to create self-sustained ecosystems catering to export markets. This programme aims to attract investments and boost India's export capacity. The Government of India has approved an outlay of Rs. 2,300 crores (US\$ 307 million) to set up eight toy manufacturing clusters, three in Madhya Pradesh, two in Rajasthan, and one each in Karnataka, Uttar Pradesh, and Tamil Nadu.

The government has implemented several other initiatives as well. Moreover, the government has been promoting the toy industry by organising events such as the Virtual India Toy Fair 2021 and Toycathon-2021. These events help young artists to conceptualise novel toys based on Indian history, civilisation, mythology, and culture.

THE ROAD AHEAD

Since the Honourable Prime Minister of India, Mr. Narendra Modi, emphasised the growing global imprint of Indian toys, multiple states across the country have come forward to foster toy manufacturing ecosystems aimed at increasing import substitution. The Government of India has taken various initiatives to ensure that no sub-standard and unsafe cheap toys are imported. The initiatives include introducing mandatory sample testing of imported shipment of toys, implementing the Toys Quality Control Order (effective 01 January 2021) and enhancing the basic customs duty from 20% to 60% for toys. Implementation of the National Toy Action Plan to support the development of toy manufacturing clusters is expected to drive toy exports from India.

Factors such as the expansion of the local manufacturing base, promotion of Indian toys with high quality and maintenance of affordability of these quality products would drive growth in Indian toy exports. The industry can enable these growth drivers by incentivising global and domestic players to build end-to-end, integrated manufacturing facilities. With the support of the government, the toy manufacturing industry is addressing issues such as cheap raw material availability and lack of skilled labour through increased research and development focus and technology integration. Such efforts should improve India's competitive edge and boost its share in the global toy export market.

CORPORATE GIFTING GLOBAL MARKET OVERVIEW

Corporate Gifting is a \$242 B dollar industry. The industry has seen a substantial amount of growth in the past couple of years and the growth of this industry is only expected to continue. Let's take a look at what this \$242 B dollar industry consists of, what the current market looks like, some interesting trends and statistics, and what the future of the corporate gifting industry holds.

The Global Corporate Gift Market As many companies have moved to a virtual format, spending on employee appreciation gifting has skyrocketed. Prior to the COVID-19 pandemic, the global corporate gifting market

was estimated to be at \$125 billion. In 2019, the corporate gifting market jumped to \$217 billion. Currently, the market has risen to be a \$242 billion industry, which is expected to swell above \$3 billion within the next two years.

CHALLENGES

Organizations demonstrated a more sophisticated understanding of how to use corporate gifting, but respondents cited continued challenges with limitations in the types of gifts they can give as well as the flexibility and scalability of gifting programs. Forty-eight percent of those surveyed manage end-to-end corporate gifting internally without a gifting platform. Among the top issues cited by respondents as "very challenging" for those managing their own corporate gifting efforts:

- Inability to purchase gifts from multiple brands/retailers (33%)
- Limited choice attributes such as color and size (32%)
- Managing gift inventory, storage and shipping (30%)
- Limited range of products (28%)

Fifty-two percent of respondents outsourced some or all of their corporate gifting needs. Outsourcing to a gifting provider represents an opportunity for organizations to centralize and streamline corporate gifting and address the challenges cited above. Outsourced gifting also allows organizations to ease friction points such as inventory management and shipping, lower costs, and deliver more engaging gifting experiences, reducing the number of issues cited as "very challenging."

INDIAN CORPORATE GIFTING SCENARIO

The Indian gifting market is estimated to be worth Rs. 2,50,000 Crore, of which corporate gifting is pegged at Rs. 12,000 crores.

With the global work landscape shifting to hybrid and remote models, corporate gifting has evolved as a mechanism for businesses to stay connected with their workforce, clients, and partners. Additionally, B2B merchandising has become an integral part of corporate gifting as brands are increasingly using it to personalize their gifts. Corporate gifting has seen a massive turnaround in terms of gifting frequency and spending led by changed work models, shifts in gifting behaviour and emerging gifting occasions. Employers are witnessing significant gains in improving employee productivity and building lasting bonds with clients. About 80 per cent of respondents claimed to have seen gifts improve connections with clients and employees, while 48 per cent described it as 'substantial benefits'.

The report covers over 2500 employees, HR leaders, and CEOs with details of the growing importance of merchandising in corporate gifting culture, the latest trends, and the ideal time to invest in corporate gifting.

About 88 per cent of respondents stated that they desire high-quality and personalized gifts, along with a variety of choices. Employee onboarding follows closely with 26 per cent saying that it is a crucial occasion in the wake of changing work culture and the necessity to attract talent. Corporate gifting has gained strategic importance for businesses in not just appealing to clients but also top talent. As such, companies are increasing their gifting budget by 25 per cent. While the popular per-gift budget range is Rs 500 - Rs 2000, companies are not shying away from shelling big bucks for gifting. 17 per cent of respondents stated that their gifting budget is between Rs 2000 - Rs 5000 per employee or client per gift. 8 out of 10 respondents want to purchase environment-friendly gifts. This has companies moving to a minimum to zero-waste gifting and packaging options. It also adds to the company's sustainability stand.

The culture of corporate gifting is humanising businesses like never before. It is also resonating brilliantly with both employees and clients as they feel cherished. The flip side of the growing prominence of corporate gifting is the challenge of finding the ideal gift. This report is intended at helping companies unlock the secret to merchandising and corporate gifting by highlighting the key trends and the best way to leverage this evolving culture. Our findings revealed that a majority of employees desire a large number of choices, which are also personalized. While festive gifting stands with the highest budget, employee joining kits are gaining significance owing to employers wanting to woo and delight the new workforce.

B2B merchandising and corporate gifting is likely to see a consistent upward trend if not exponential with a growth rate of about 23 per cent. This is primarily because hybrid and remote work models are becoming a norm. Also, companies are realizing that employee recognition and client delight are the tenets of a successful business.

ROAD AHEAD

The pandemic has changed the corporate gifting scene in India. From standardized gifts, organizations have become thoughtful about giving even better and more meaningful corporate gifts that actually add value to the lives of the recipients.

Many of these gifts are geared towards ethical products or customized wellness products that can be used regularly rather than just be displayed in a corner. Despite the fact that the pandemic drastically slowed down India's economic growth in the last few years, the gifting industry is still very much alive.

By 2024, the Indian online gifting business is expected to be worth \$84 billion. With the idea of long-distance gifting made simple, especially for WFH employees, online gifting has taken Centre stage. The online gifting business in India has strong long-term growth possibilities, especially given the current epidemic that has devastated brick-and-mortar stores.

PROMOTIONAL PRODUCTS OVERVIEW

Promotional products have a long history – George Washington is said to have created the first promo item in 1789 with an election button.

It's fair to say the industry has moved on just a little since then, but the concept is still the same; give customers, clients, and colleagues branded gifts to make them remember your brand in the long term.

The market for promotional products took a knock during the pandemic, with trade shows and events cancelled and marketing budgets cut initially.

The industry is resilient, however, and distributors and manufacturers can still expect to see growth in the coming years. the highlights of the industry statistics:

- Between 2020 and 2024 the predicted compound annual growth rate (CAGR) for the promotional products sector is 3%
- Globally, 85% of people who are given a promotional item will remember the advertiser that gave it to them.
- In 2020, 21.6% of marketers used online swag bags as a marketing tool to engage virtual event attendees.
- Choosing the right product is key – 72% of people say that a brand's reputation is reflected in the quality of the promo products they receive.

(Source: <https://swagdrop.com/promotional-products-statistics/>)

CHALLENGES

Acting as independent agents and selling products to their clients, the nation's more than 24,000 distributors develop ideas for using promotional products in marketing or promotional campaigns, buy the items from the supplier and then sell them to end customers. This supply chain requires a high degree of orchestration. Here are four problems in the industries:

It can feel like you're herding cats. The promotional products industry has complex, multi-level relationships, including the movement of goods from vendor-to-vendor, then vendor-to-customer and even multiple location drop-shipments which requires sophisticated software and processes to operate efficiently. All entities, products, protocols and procedures must be orchestrated in a very efficient, productive and customer-centric way. For example, extensive collaboration is often needed to obtain approvals on artwork and customized goods or samples before they are mass produced. Done correctly, this can help to drive consistent profitability and growth for the companies that operate in this space.

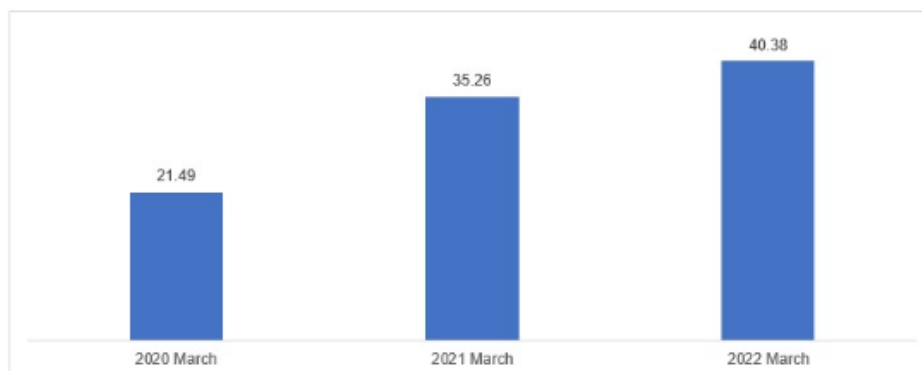

- One wrong move and you've lost a customer. Order entry, artwork and file management must all be orchestrated perfectly in order to get the correct promotional product made and into the hands of the end customer. Just one mistake on a proof, one wrong color selection or an incorrect order quantity can put an entire order in jeopardy (not to mention the negative impact it has on the client relationship).
- It's a dual-channel, fragmented space. The lines between manufacturing (aka, "supplier") and distribution do tend to blur in this sector, but the former typically focuses on importing goods from overseas and then applying the silk screening, embroidery, and other custom embellishments to the products. From there, distributors take orders from customers that want promotional products to give away at trade shows, hand out to employees, and give to customers. After nailing down the customization requirements, distributors manage the procurement from manufacturers, the customer service component, and anything else the end customer requires. Extend Tech, which delivers service bundles for both supplier and distributor organizations, often finds itself working with companies that rely on a patchwork of proprietary and off-the-shelf technology systems to run their businesses.
- Large suppliers hold a lot of the tech cards. Most companies are using systems developed by large suppliers to place orders, check on those orders, invoices and receive payments. These highly proprietary systems often don't talk to one another, nor do they allow for easy integration with systems that enable more modern functionalities (e.g., mobile ordering capabilities). On the production floor, for instance, automating the warehousing and/or manufacturing environment is both necessary and challenging. That issue rings true for both distributors that manage the manufacturing functions themselves and for the entire universe of suppliers. Lacking a unified, cloud ERP, these companies must allocate time, resources, and labor to using their larger suppliers' systems.

The Merchandise Industry of India

India's share in global merchandise exports has rapidly increased to a record-high value. The country has become a focal point for the fashion industry, reflecting a rapidly growing middle-class population and an increasingly powerful manufacturing sector. These factors, coupled with robust economic fundamentals and advancing technology, have enabled India to become the top merchandise exporter globally. The country's merchandise exports hit a record-high value of US\$ 40.38 billion in March 2022, increasing 14.53% year-on-year from US\$ 35.26 billion.

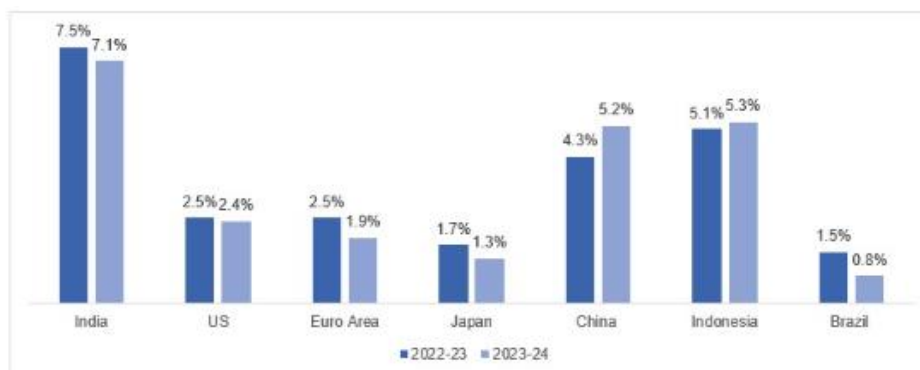

Merchandise Exports from India (US\$ Billion)

Source: Ministry of Commerce and Industry (India merchandise exports and imports data)

India is projected to record the fastest growth among its counterparts. Its economic growth is expected to be the fastest in the world at around 8-8.5% in 2022-23, with the country set to evolve from a strong sourcing hub to a large consumer market beyond the western world.

Expected Economic Growth (India Vs. Other Countries)

India's Merchandise Exports

India's annual merchandise exports surged 43.18% year-on-year from US\$ 291.81 billion to a record-high value of US\$ 417.81 billion in FY 2021-22. Growth in exports could be attributed to a 4.28% increase in the value of non-petroleum exports to US\$ 33.00 billion in March 2022 compared to March 2021. The top 10 essential commodity groups – engineering goods, petroleum products, gems and jewellery, organic and inorganic chemicals, pharmaceuticals and drugs, electronic products, ready-made garments (RMG) of all textiles, cotton yarn, plastic, and linoleum and rice – accounted for 81% of total exports in 2021-22.

Make in India Movement

The Make in India initiative, launched in 2014, has played a crucial role in facilitating investments, promoting innovation, driving the overall development, creating a state-of-the-art infrastructure, and making India a major hub for manufacturing, innovation, and design. Under the Make in India initiative, the government has been implementing various schemes to promote the development of world-class infrastructure facilities for manufacturing units in the country.

The Foreign Direct Investment (FDI) policy under the Make in India initiative is also expected to drive growth and promote domestic exports. As per this policy, the central government approved 100% FDI under an automatic route in many sectors to boost exports. Moreover, the government implemented the Production Linked Incentive (PLI) scheme to strengthen the textile industry. The PLI scheme for the textile industry, announced during the Union Budget 2021-22, aims to maximize the country's domestic production and create over new job opportunities within the sector and also in the supporting industries. The Make in India initiative is also expected to empower women, boosting women's contribution to the economy.

The Make in India initiative has made cross-border trading hassle-free, as described below:

The Central Board of Excise and Customs (CBEC) implemented the Indian Customs Single Window Project (ICSWP) to promote and facilitate trading; the ICSWP enables traders to easily lodge their custom-related clearance documents. The government also launched PCS1x, which aims to combine 27 maritime participants on one platform.

Mandatory documents needed for customs purposes and for facilitating trade have been decreased to three.

A web-based platform, e-Sanchit, was launched to allow traders to report all documents digitally.

A computerized risk management system was implemented to enhance transparency and decrease custom inspections.

Government Initiatives

The Merchandise Exports from India Scheme (MEIS), launched in 2015, is considered a game-changer for the Indian merchandise industry. The scheme is mainly designed to reward exporters for offsetting infrastructural inadequacies and associated expenses. Furthermore, the Duty Credit Scrips and items imported or domestically procured against them will be freely transferable. The following are some uses of the Duty Credit Scrips:

Essential customs duty payments and extra custom duty as specified in the Customs Tariff Act of 1975 for importing inputs like capital goods

Payments of exercise duty on domestic procurement of goods

The MEIS primarily aims to expand the country's exports of goods and products. Despite the onset of the COVID-19 pandemic, India's merchandise exports crossed the US\$ 400 billion mark for the first time during 2021-22. This can be considered a crucial milestone in India's journey to becoming self-reliant. Until March 2022, Taiwan, Korea, Australia, Bangladesh, Poland, Brazil, Belgium, Saudi Arabia, Indonesia, Japan, Italy, Turkey, the US, Canada, South Africa, Nigeria, Egypt, the Netherlands, and Mexico were the only countries to achieve export-related targets; countries such as China, France, Israel, Nepal, Sri Lanka, and Vietnam achieved 90-100% of their combined export targets. The government of India has been putting in considerable efforts to deliver an investor-friendly environment and infrastructure and provide the necessary infrastructure by implementing export-oriented policies.

Since 2014, the government of India has taken several steps to increase the country's exports, including:

1. Launching the MEIS and Services Exports from India Scheme (SEIS) to improve the export of goods and services, respectively (the Duty Credit Scrips announced under these schemes were made completely transferable)
2. Conducting a mid-term review of the Foreign Trade Policy (FTP) in 2017 and implementing corrective actions
3. Extending the FTP by a year, up to March 2022 (due to the pandemic)
4. Creating a new logistics division in the commerce ministry for developing the logistics sector
5. Launching several schemes to enhance exports

The Road Ahead

Amid the recovery in the global demand after the Covid-19 pandemic, India's merchandise exports have been reviving rapidly in the past few months, supported by the recovery in global demand. External trade recovered sharply during 2021-22. Capital flows remained strong, leading to the rapid growth of foreign exchange reserves. The export revival was also due to robust government initiatives. The merchandise sector of India is expected to rise sharply in the coming years and will be a crucial contributor to India's US\$ 5 trillion economy goal. Furthermore, continuous efforts have been made to enhance the country's domestic capacity by developing close collaborations with the industries to unleash India's competitive advantages. The PLI scheme is also expected to play a crucial role in making India a global export powerhouse.

The Factories Act lays out guidelines and safety measures for using machinery, and with its strict compliance, it also provides owners with instructions. When factory workers were taken advantage of and exploited by paying them low wages, the Factories Act was passed.

Bureau of Indian Standards Act, 2016 (the "BIS Act")

The Bureau of Indian Standards Act, 2016 provides for the establishment of bureau for the standardisation, marking and quality certification of goods. The Legal Metrology Act, 2009 ("Legal Metrology Act")

The Legal Metrology Act, along with the relevant rules, establishes and enforces standards of weights and measures, regulates trade and commerce in weights, measures and other goods which are sold or distributed by weight, measure, or numbers. The Central Government is empowered to appoint a director to exercise the powers and to discharge duties. The Legal Metrology Act prohibits the manufacture, packing, selling, importing, distributing, delivering, offer for sale of any pre-

packaged commodity if such does not adhere to the standard regulations set out.

The Legal Metrology (Packaged Commodities) Rules, 2011, with amendments up to June 2017 ("Legal Metrology Rules")

The Legal Metrology Rules are ancillary to the Legal Metrology Act and set out to define various manufacturing and packing terminology. It lays out specific prohibitions where manufacturing, packing, selling, importing, distributing, delivering, offering for sale would be illegal and requires that any form of advertisement where the retail sale price is given must contain a net quantity declaration. Circumstances which are punishable are also laid out.

Currently, Legal Metrology (Packaged Commodities) Rules, 2011 ("**Packaged Commodity Rules**") require a declaration of 'country of origin' or 'country of manufacture' or 'country of assembly' on the imported products. This is aimed at curbing false and misleading claims by the brands to deceive the customers, as also to give complete information of the product to a potential buyer. Demands for specifying the Country of Origin ("COO") of products sold online has gained ground in view of Prime Minister's vision "Make in India".

Phased implementation of Unified Payments Interface

SEBI has issued a UPI Circulars in relation to streamlining the process of public Issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public Issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I:

This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended until June 30, 2019. Under this phase, an RII also had the option to submit the ASBA Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II:

This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Under this phase, submission of the physical ASBA Form by an RII through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, extended the timeline for implementation of UPI Phase II till further notice.

Phase III:

The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days.

The Offer will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Bid/Issue Opening Date.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 has prescribed the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government of India has from time to time made policy pronouncements on foreign direct investment ("FDI") through press notes and press releases.

The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, GoI, earlier known as Department of Industrial Policy and Promotion ("DPIIT") has issued the Consolidated FDI Policy Circular of 2020 ("FDI Policy") by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by DPIIT that were in force and effect as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular.

As per the current FDI policy, FDI in companies engaged in manufacturing sector is permitted up to 100% of the paid-up share capital of such company under the automatic route.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route as per the FDI Policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits provided under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India, has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.
